FORUM EDGE

# EDGED AESTHETICS

The FORUM Edge has changed the shape of standard panel lighting and is not all aesthetics. Imagine, high lumen output and more flexibility without the footprint. Available in 1x1, 1x2, 1x4, 2x2, and 2x4 size options Liteline's FORUM EDGE fits perfectly into a T-bar ceiling with the acoustic tile on top, no trimming needed!

Included lay-in clips make for easy T-bar installation, while the ability to mix and match with other Liteline products such as the FORUM Panel, will allow for project dreams to become reality.
